

Senior .NET Full Stack Developer

Role Overview

We are looking for a skilled **Senior .NET Developer** with strong backend development experience and exposure to enterprise applications. The candidate should be proficient in C#, comfortable working with SOAP services, and capable of troubleshooting Java-based systems at a basic level.

Key Skills (Mandatory)

- Strong experience in **.NET / .NET Core and C#**
 - Working knowledge of **Java (run & debug capability)**
 - Experience analysing and validating **SOAP services / WSDL / XML**, Understanding of service contracts and payload validation
 - Experience building and maintaining Web APIs / enterprise applications
 - Understanding of layered architecture and clean coding practices
 - Strong understanding of **OOPS concepts**
 - Good hands-on experience in **SQL (queries, stored procedures, joins)** and ability to analyse database-related issues.
 - Strong debugging and problem-solving skills
 - Ability to support team members and resolve technical blockers
-

Good to Have

- Working experience in **React JS**
 - Experience in Agile/Scrum environments
 - Exposure to enterprise-level applications
-

Responsibilities

- Develop and maintain applications using .NET technologies
- Comfortable handling backend + service integration scenarios
- Analyse and troubleshoot SOAP-based integrations
- Support cross-functional teams and resolve technical issues
- Ensure clean code and adherence to best practices.
